PURPOSE OF THE BILL

The purpose of H.R. 2440 is to improve the implementation of the federal responsibility for the care and education of Indian people by improving the services and facilities of federal health programs for Indians and encouraging maximum participation of Indians in such programs, and other purposes.

BACKGROUND AND NEED FOR LEGISLATION

The Indian Health Care Improvement Act (IHCIA) became Public Law 94–437 in the 94th Congress (September 30, 1976), and has been amended seven times since. IHCIA provides for health care delivery to over 2 million American Indians and Alaska Natives. Congress enacted a one-year reauthorization of appropriation through fiscal year (FY) 2001 but efforts at further extensions were interrupted due to 9/11/01 events. Appropriations for Indian health have continued through the Snyder Act, a permanent law authorizing expenditures of funds for a variety of Indian programs, in-

cluding health. For FY 2003, Congress appropriated \$2.9 billion to help provide health care services to American Indians and Alaska Natives.

Since 1998, the Indian Health Service (IHS) has coordinated an IHCA reauthorization process by convening a roundtable to begin the discussion of the reauthorization and to give guidance to the consultation process which included all stakeholders. Coordinators from the 12 IHS areas formed workgroups. These meetings were to inform tribes about the reauthorization process, and provide opportunities to discuss and reach consensus on recommendations for IHCA. Four regional consultation meetings were held to provide further opportunities for tribes to provide input, share recommendations from the 12 IHS areas, and build consensus among participants for a unified position.

The IHS Director also convened a National Steering Committee (NSC) to be responsible for the final drafting of the report on the IHCA recommendations. The NSC is composed of one elected and one alternate tribal representative from each of the 12 IHS areas, a representative from each of the National Indian Health Board, the National Council of Urban Indian Health, and the Self-Governance Advisory Committee. During the course of the four meetings, this group's responsibility evolved from compiling a final report of recommendations¹ to the drafting of the actual IHCA reauthorization bill language.

H.R. 2440 is the result of the NSC Committee meetings and further work by the Committee on Resources. Both the NSC and the Committee worked carefully to ensure that whenever possible, H.R. 2440 did not represent a regression from the authorities provided in current law. During consideration of the bill by the Resources Committee, Congressman Don Young offered an amendment in the nature of a substitute that removed from the introduced bill changes to the Medicare system. At this time, there was concern that consideration of any changes to the Medicare law soon after the enactment of the Medicare Modernization Act (Public Law 108-173) may be burdensome and impede the reauthorization of IHCA.

COMMITTEE ACTION

H.R. 2440 was introduced on June 11, 2003, by Congressman Don Young (AK). The bill was referred primarily to the Committee on Resources, and additionally to the Committee on Energy and Commerce, and the Committee on Ways and Means. On July 16, 2003, a joint hearing was held by the Committee on Resources and the Senate Committee on Indian Affairs. On October 1, 2003, the Committee on Resources held a second hearing on the bill. On September 22, 2004, the Full Resources Committee met to consider the bill. Congressman Don Young offered an amendment in the nature of a substitute to make numerous changes to the bill, including the removal of various Medicare and Medicaid sections, as well as provide clarifying language throughout the bill. It was adopted by unanimous consent. The bill, as amended, was then ordered favorably reported to the House of Representatives by unanimous consent.

¹ The final report, entitled "Speaking with One Voice," identified areas of consensus and differences.

SECTION-BY-SECTION ANALYSIS

Section 1. Short Title

This section provides a short title for the bill, the “Indian Health Care Improvement Act Amendments of 2004.”

Section 2. Indian Health Care Improvement Act Amended

This section replaces the existing Indian Health Care Improvement Act (25 U.S.C. 1601 et seq.) with new text, as further described below.

Section 2. Declaration of National Indian Health Care Policy

A new section 2 of IHCIA declares that it is the policy of the United States that the health status of American Indians and Alaska Natives should be raised by 2010 to the same level as is set for other Americans, instead of following the lower thresholds seen in the past. It also establishes a policy regarding the importance of “meaningful consultations” with Indian tribes, tribal health organizations and urban Indian organizations.

Section 3. Definitions.

A new IHCIA section 3 modernizes the definitions used in the IHCIA and makes them consistent with the Indian Self-Determination and Education Assistance Act. Definitions of “health promotion” and “disease prevention” are expanded to encompass the full scope of these activities as recommended by the World Health Organization.

TITLE I—INDIAN HEALTH, HUMAN RESOURCES, AND DEVELOPMENT

Section 101. Purpose

A new section 101 states the interest in this new Title I of assisting Indians in getting them more involved in the health care arena, both as health professionals and providing health services. The new IHCIA sections 102, 103, 104, 108, 109, 111, 112, 113, 114, 117, 118, 122, 203, 204, 206, 211, 216, 217, 219, and 706 continue existing program already in current law.

Section 110. Indian Health Service Loan Repayment Program

Section 115. Quentin N. Burdick American Indians Into Nursing Program

New section 115 renames a current program after Quentin N. Burdick.

Section 116. Tribal Cultural Orientation

New IHCIA section 116 continues an existing program with a focus on educating appropriate employees in the history and culture of Indian Tribes with whom they work.

Section 120. Nursing Residency Program

The new section 120 of IHCIA expands an existing program to include advanced degrees in nursing and public health.

Section 121. Community Health Aide Program for Alaska

The new section 121, subject to the availability of new funding, authorizes IHS to develop this existing program nationally. The Committee considered various options prior to amending this section. The reported text will continue to allow the Community Health Aide Program (CHAP) to expand nationally. The Committee believes the importance of the dental health aide program should not be understated. This program provides an important extension of the community health aide program because dental health aides will work and live in the villages helping to establish disease prevention and health education programs that can break the dental disease cycle affecting many American Indians and Alaska Natives.

The best solution to dental disease is the prevention of disease and the dental health aides, including dental hygienists, will be the front-line workers in these preventive measures. With the emphasis on prevention, the amount of new active disease can be reduced and treatment of any new active disease can be more easily managed. The Committee crafted the language with input from other concerned Members to ensure safety and continued quality

care in the larger CHAP program, while understanding that dental health aide therapists are not permitted to provide procedures that could result in irreversible damage.

Dental health aides are an important component to the health care system for Alaska Natives. Due to the extensive oral health care needs of the numerous villages across the State of Alaska, the best way to develop and implement successful long-term quality dental programs in Alaska is to increase access to oral health care. Therefore, the Committee welcomes the commitment of the Alaska Dental Society, with the full support of the American Dental Association, to work in collaboration with Alaska Native people and Native Corporations to increase the number of dentists to help fill the unmet need for dental services for Alaska Natives on an ongoing basis, in such a way that provides continuity of care. Further, the Committee encourages the Alaska Dental Society and the American Dental Association to work in conjunction to develop a volunteer program at no cost to the IHS to bring dentists to rural Alaska to help meet the crisis in dental care in the State.

Section 123. Health Professional Chronic Shortage Demonstration Programs

New IHCIA section 123 expands authority to fund demonstration projects for clinical education and quality improvement programs. This will improve quality of care for tribes while giving health professionals new opportunities in Indian country.

Section 124. Treatment of Scholarships for Certain Purposes

The new IHCIA section 124 makes scholarships provided under Title I of IHCIA tax exempt under section 117 of the Internal Revenue Code of 1986.

It also provides for an initial report by the General Accounting Office of all IHS and tribal health facility construction, expansion and improvement needs with updates to be done by the Secretary every five years, so that the full unmet need can be known and tracked.

Section 302. Sanitation Facilities

The new IHCIA section 302 updates terminology so that it is simpler and more accurate. It provides for newly constructed homes to be assisted by the program under certain conditions and provides authority for use of funds from a wider range of funding sources. The section further provides for planning, design and construction standards to be set through negotiated rulemaking, requires local responsibility for operating and maintaining systems, and modernizes the determination of deficiencies in sanitation systems.

Section 303. Preference to Indians and Indian Firms

Section 303 continues an existing program with the addition of a new “Section 303 (“Labor Standards”).” This new section provides authority to rely on local wage standards, as determined by the tribe or tribal organizations, for tribal health facility and sanitation facility construction.

Section 306. Indian Health Care Delivery Demonstration Project

New IHCIA section 306 specifically expands the types of facilities that may be funded to include hospice and child care facilities. It authorizes IHS funds to be used as matching dollars for other funds, including other federal funds, and provides that the criteria for funding shall be developed through negotiated rulemaking.

Section 307. Land Transfer

New section 307 authorizes land transfers to IHS from all federal agencies for the provision of health care services.

Section 308. Leases, Contracts, and Other Agreements

New IHCIA section 308 provides that leases by IHS of tribal facilities shall be treated as operating leases for the purposes of scoring under the Budget Enforcement Act. This section will encourage tribal health programs to finance their own new construction leases.

Section 309. Study on Loans, Loan Guarantees, and Loan Repayment

New section 309 has changed from the introduced version of the legislation in large part due to objections from the Department of Health and Human Services. The Committee has had success in the expansion of loan guarantee programs in other arenas of Indian policy, and was interested in continuing this pursuit in conjunction with providing expanded capital access opportunities for tribes and their health care delivery pursuits. The reported language directs the Secretary, in consultation with the Secretary of the Treasury, Indian tribes, and tribal organizations, to conduct a study to determine the feasibility of establishing a loan fund to provide to Indian tribes and tribal organizations direct loans or guarantees for loans for the construction of health care facilities. It also directs the Secretary to provide a report no later than September 30, 2006, on the manner of consultation made as required and the results of the study, including any recommendations of the Secretary based on the results of the study.

It also authorizes \$20 million construction of a health care facility and such sums as are necessary for the expenses related to this facility on the Fort Berthold Reservation of the Three Affiliated Tribes. The section also makes technical corrections relating to the changes made regarding the introduction of an Assistant Secretary for Indian Health. Language in this section is reflective of S. 1146, a bill to implement the recommendations of the Garrison Unit Joint Tribal Advisory Committee by providing authorization for the construction of a rural health care facility on the Fort Berthold Indian Reservation, North Dakota, which at the time that H.R. 2440 was ordered reported, was not yet public law.

It also authorizes the Secretary to enter into agreements with States regarding reimbursement to the State for services provided by the IHS, tribal health programs and urban Indian organizations. This section also requires States to consult with Indian health programs.

The Committee would also like to note that the introduced version of this legislation included a section regarding the review of Medicare and Medicaid Payment system. At the request of the Department of Health and Human Services, the Committee omitted a provision requiring the Secretary of Health and Human Services to examine the extent to which Medicare and Medicaid payment methodologies take into account the unique and special circumstances of the provision of covered services by health programs operated by the relevant Service and tribal entities. The Department indicated to the Committee that it has sufficient authority under existing law to undertake this payment methodology review. That said, the Committee is hopeful the Secretary will perform such a review pursuant to existing authority. The review should include the current payment methodologies applicable to the Indian health system. The objectives of the review should be to determine the sufficiency of payments to the providers in the Indian health system under various payment methodologies both in terms of assuring access to care and payment at rates consistent with those

for most favored providers. Moving forward, the Committee looks forward to the recommendations made by the Department of Health and Human Services to Congress.

While this study is being performed and during the time Congress reviews the Secretary's recommendations for potential legislative action, the Committee expects the Department to maintain in place the current payment methodology for Indian health programs.

[(D) "s" is the number of months of such period served by such individual in accordance with this section.

[(n) The Secretary shall submit to the President, for inclusion in each report required to be submitted to the Congress under section 801, a report concerning the previous fiscal year which sets forth—

[(B) In the case of health facilities operated under a contract entered into under the Indian Self-Determination Act, the governing body of the Indian tribe or tribal organization providing health services under such contract is authorized to determine whether health services should be provided under such contract to individuals who are not eligible for such health services under any other subsection of this section or under any other provision of law. In making such determinations, the governing body of the Indian tribe or tribal organization shall take into account the considerations described in subparagraph (A)(ii).

[(2)(A) Persons receiving health services provided by the Service by reason of this subsection shall be liable for payment of such health services under a schedule of charges prescribed by the Secretary which, in the judgment of the Secretary, results in reimbursement in an amount not less than the actual cost of providing the health services. Notwithstanding section 1880(c) of the Social Security Act, section 402(a) of this Act, or any other provision of law, amounts collected under this subsection, including medicare or medicaid reimbursements under titles XVIII and XIX of the Social Security Act, shall be credited to the account of the facility providing the service and shall be used solely for the provision of health services within that facility. Amounts collected under this subsection shall be available for expenditure within such facility for not to exceed one fiscal year after the fiscal year in which collected.

[(B) Health services may be provided by the Secretary through the Service under this subsection to an indigent person who would not be eligible for such health services but for the provisions of paragraph (1) only if an agreement has been entered into with a State or local government under which the State or local government agrees to reimburse the Service for the expenses incurred by the Service in providing such health services to such indigent person.

[(3)(A) In the case of a service area which serves only one Indian tribe, the authority of the Secretary to provide health services under paragraph (1)(A) shall terminate at the end of the fiscal year
